

## Lab 5

**Due: 11/8 EOD**

Read the CSA Security Guidance v5 book! Anything you read that you can implement on your VMs and/or apps, do so! Write up what you did in your README.md file.

Yes, you can read a whole 300 page book in one week. You are capable of that much reading and understanding. If you're someone who hates reading, take this as practice for consistent, engaged interaction with a text; it is an important skill like any other to practice and improve.

### Grading

Read the book	10 pts
Implement security improvements	30 pts
README.md	10 pts
<b>TOTAL</b>	<b>50 pts</b>
