Lab 6
Due: 11/15 EOD

Look at your current lab (whatever your lab is like after lab 5) through the lens of each one of the items in Morville's honeycomb. For each of the seven lenses, write in your README.md file what you observe, what your areas of success are, and where your opportunities for improvement are. Using the Laws of UX site (https://lawsofux.com/), figure out which laws map to which lens. Then do your best to implement one area of improvement for each lens (and tell us what you did in your README.md file).

You may work with your group and me and the TAs to identify success/opportunities and map laws to lenses. You must work by yourself to do the implementing.

As always, you must cite all your sources in your README.md file. Failure to cite sources = 0 on lab. You must also include a ZAP report (-10 if no ZAP report).

Grading
UI/UX improvements   30 pts
README.md   20 pts
TOTAL   **50 pts**
